

Privacy Policy

Product

Dormi–Baby Monitor (Android app)

This privacy policy explains in detail what information Sleekbit, LLC (“we”, “us” or “our”) collects and how we use your personal information when you use the Product. We may update this policy at any time; please check back frequently to stay current. Your continued use of the Product indicates that you have read this Privacy Policy and that you accept its terms. You also give your express permission for us to collect, store, and use your information in accordance with this Privacy Policy. At all times, your use of the Product is governed by our Terms of Service, available [here](#).

1. In brief

Given the nature of our product, the importance of your privacy is paramount. To that end, our application:

1. end-to-end encrypts your audio and video streams,
2. uses an encrypted channel to set up and maintain your monitoring session,
3. collects as little personally identifiable information as possible, given the functionality required. See (3) below.

A detailed description of the protocols and algorithms in use is available [here](#).

2. What is personal information and what is processing of personal information

Personal information (or data) is any information relating to you and that alone or in cumulation with other pieces of information gives the opportunity to the person that collects and processes such information to identify you as a person. It can be your name, your identification number, your location data, or information related to your physical, physiological, genetic, mental, economic, cultural or social life. Processing of the information means any action with your personal data, for example, collection, recording, organisation, structuring, storage, use, disclosure by any means and so on.

3. Personal information we collect

For our service to be functional (i.e. interconnecting multiple devices in a monitoring session over different types of network topologies), we temporarily (for the duration of a session) store the following information on our servers:

1. your IP address,
2. a hash of your randomly generated Group ID.

We also permanently store a unique identifier (UID) assigned to you by Google (on a per-app basis) to reward you with free monitoring time (recurring monthly). The purpose of this free allowance is to let anyone evaluate the app without having to make a payment, and/or continue using it for a prolonged time period, if usage was minimal.

If you are using our services from the EEA, where GDPR applies, the processing of this UID happens only after we obtain your explicit consent to doing so.

Alternatively, you may purchase any of the unlimited monitoring items offered under the Billing tab of Rewards & Billing.

Please note that we are doing our best to secure this data from any third party.

4. Who we share your personal information with

We do not share your personal information with any third party.

5. Changes to this notice

Our activities may evolve over time and we may update this privacy policy accordingly. For significant changes to this policy we will try to give you reasonable notice unless we are prevented from doing so. Where required by law we will seek your consent to changes in the way we use your personal information.

6. Contacting us

In the event of any query or complaint in connection with the information we hold about you, please email us at: privacy@sleekbit.com
